CHAPTER IX

MILLING AND PLANING FIXTURES

PAGES

Fixture for milling to a Given Length — Duplex Fixture
— Adjustable Fixture for Angular Work — Fixture
arranged for Lateral and Angular Adjustment —
Indexing
Milling Fixtures — Various Designs of
Radial Milling
Fixtures — Examples of Planer Fixture Design
211-241

CHAPTER X

ADJUSTABLE FIXTURES FOR TURRET LATHES AND VERTICAL BORING MILLS

Important Points in the Design — Adjustable
Fixture for Holding Castings of Different Diameters —
Adjustable Fixture for Special Bevel Gear Blanks —
Provision for maintaining Accuracy in Adjustable
Fixture — Various Designs of Adjustable Fixtures for
Vertical Boring Mills.:. 242-256

CHAPTER XI

THE FLOATING PRINCIPLE AS APPLIED TO FIXTURE WORK

Important Points in the Application of Floating
Principle
—.....Piston
Drill Jig with Floating Clamps — Drill Jig for
Rough Collar — Drill Jig with Floating
Bushings and
Locating Vees — Milling Fixture with
Floating Clamps
and Locator — Various other Designs of
Locating Devices
illustrating the Application of the Floating
Principle.....
257-275

CHAPTER XII

APPLICATION OF THE THREE-POINT PRINCIPLE IN FIXTURES

Three-point Locating and Clamping Devices —
Three-
point Support for Flywheel Fixture — Three-point
Fixture

for Pot Casting — Two Methods of Obtaining a Three-
point
Support *on* a Hub Casting — Fixture having Three
Clamp
ing Jaws and Three Locating Pads — Double Three-
point
Locating Device..... 276-
287
